Tarrant County Hospital District Bond Election

NOVEMBER 6

The Tarrant County Hospital District Bond Proposition
was developed through a multi-year process.

- This November's bond proposition has been submitted for voter determination only after an extensive multi-year process involving:
 - public input,
 - a thorough current and long-range needs assessment,
 - a review of the needs assessment by the Citizens Blue Ribbon Committee,
 - dedicated work by the Tarrant County Commissioners Court, Hospital District Board of Managers, and staff.

Tarrant County Hospital District's \$800 Million Improvement Bond Proposition will NOT increase the Tax Rate.

- Our Tarrant County Commissioners Court ensured that only a **no tax rate increase** Hospital District bond improvement proposition would be submitted for voter determination.
- Over the past 15 years, the property tax rate for the Tarrant County Hospital District has declined.
- Approximately **60%** of the Hospital District's operational revenue comes from Medicare, Medicaid, private insurance, grants, and other **non-property tax sources**.

Our Commitment To A No Tax Rate Increase Hospital District Bond Package Involves:

- **Pay-As-We-Go** bond program oversight: the Commissioners Court will have direct oversight of the bond program (for construction and maintenance) to ensure no tax rate increase.
- **Not all bonds will be issued at the same time.** Hospital District bonds will be issued over the next 10 years in increments to ensure market conditions don't inadvertently impact the tax rate.
- **Millions of taxpayer dollars are expected to be saved through efficiencies** such as expanding our internal mental health hospital capacity, instead of sending these patients to private facilities.

Our Commitment To A No Tax Rate Increase Hospital District Bond Package Involves:

- **Finally, a healthy county population goes hand-in-hand with reducing operational costs** of our County's Hospital District. It's not efficient to treat everyone in an emergency room environment. To guard against an epidemic health care crisis on the physical health and financial well-being of our citizens, and to protect against higher costs, the Hospital District is committed to ensuring we have the following adequate services and facilities: patient, mental health, cancer, surgical and trauma.

Quick FACTS on Hospital District and Tarrant County

- Today, every 25 seconds a patient need is cared for by the Tarrant County Hospital District.
- It's been 33 years since the Tarrant County Hospital District held a bond election.
- Since 1985, Tarrant County's population has grown by more than one million citizens.
