Static Trap ❑
Temporary Trap ❑

Mosquito Surveillance Form

West Nile virus/St. Louis encephalitis virus Tarrant County Public Health

CITY/COUNTY USE ONLY

Collection date: _____ City:_____ County:_____

Address:_____ Trap type: _____

Zip:_____ Lat:_____ Long:_____ Mapsco: _____

Collector's Name: _____ Department: _____

Trap set time: _____ Temperature: _____

Trap pick-up time: _____ Temperature:_____

Has there been an overnight rain event? ☐ Yes ☐ No

Notes: (trap malfunction?)_____

Instructions:
1. Brew gravid water with grass clippings (hay/alfalfa acceptable) for a minimum of 5 days (10 preferred) in a *closed* lid container (to prevent mosquitoes from breeding in your trapping attractant).
2. Set trap. On the following morning collect mosquitoes. Keep mosquitoes cool in the field by placing them in a container with cold packs.
3. Transfer mosquitoes to provided container (place them in a freezer for about 8 minutes to knock them down).
4. Label container with Date, City and Address
5. Deliver containers/forms to TCPH, 1101 S Main St, Suite 2300, Fort Worth, TX 76104 no later than 12:00pm on the day prior to designated testing date.

Identification
