

TARRANT COUNTY PUBLIC HEALTH

Project HIP (Health Information is Power) Program Request Form

Tarrant County Public Health (TCPH) Project HIP is a train-the-trainer program promoting the reduction of infectious diseases and healthy lifestyle choices such as dangers of smoking, importance of exercise, healthy eating and mental health awareness in the target population ages 14 – 24, through group education. This program is a result of a call-to-action made to address the consistent higher number of sexually transmitted infections, including HIV; disproportionately affecting Tarrant county residents ages 14 to 24. The goal of this program is to reduce the prevalence of HIV/STI burden and adverse health outcomes among Tarrant County youth. Through Project HIP youth abstinence is encouraged, we empower youth to make healthy lifestyle choices for themselves, their partners, and their futures.

Organizations/groups can partner with TCPH Project HIP to become agency trainers in their own organizations/groups. Project HIP is a train the trainer concept that trains teacher, staff and youth leaders to train the youth within their own organizations/groups. The benefit of training teachers, staff, and youth leaders promotes a community-based strategy specifically designed to reach individuals at high risk for acquiring HIV and STI's. CEU's are available upon completion of the TCPH Project HIP program.

The Tarrant County Public Health Project HIP program is comprised of two (2) knowledgeable TCPH employees regarding STD/HIV prevention and healthy lifestyle education. Each request is sent to experts who can speak on STD/HIV.

Before a request can be forwarded to a speaker, we ask you to complete the required details on the form below.

The Project HIP Facilitator who services the requested area will follow-up with the point of contact to schedule an introduction presentation.

Requesters are to make all final arrangements directly with the Project HIP Facilitator.
